 Tyrosine 3-monooxygenase (EC 1.14.16.2) - quail

N;Alternate names: tyrosine 3-hydroxylase
C;Species: Phasianidae gen. sp. (quail)
C;Date: 19-Nov-1988 #sequence_revision 19-Nov-1988 #text_change 31-Mar-2000
C;Accession: A28582; PHI524
R;Fauquet, M.; Grima, B.; Lamouroux, A.; Mallet, J.
J. Neurochem. 50, 142-148, 1988
A;Title: Cloning of quail tyrosine hydroxylase: amino acid homology with other hydro.
A;Reference number: A28582; MUID:88089590; PMID:2447231
A;Accession: A28582

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      tryptophan 5-monooxygenase (EC 1.14.16.4) - rat

N.Alternate names: tryptophan 5-hydroxylase
C,Alternate names: tryptophan 5-hydroxylase
C,Species: Rattus norvegicus (Norway rat)
C,Accession: JL0034; A60034; A24367

y, Residues: 30,35-528 (SR13>
y, Cross-references: GB:X05290; NID:g32501
y, Experimental source: splice form 3
y, Note: this isozyme is produced by use of an alternative donor site within exon 1

A;Title: Nucleotide sequence of a full-length complementary DNA clone and amino acid seq
A;Reference number: A00508; MUID:85199778; PMID:2986678
A; Description: catalyzes the 4'-hydroxylation of phenylalanine to tyrosine by tetrahydrd A; Pathway: tyrosine biosynthesis; phenylalanine catabolism cisuperfamily: phenylalanine 4-monooxygenase C; Keywords: biopterin; homodimer; iron; metalloprotein; monooxygenase; oxidoreductase; F; 16/Falhading site: phosphate (Ser) (covalent) (by calmodilin-dependent kinase) #status F; 23/Binding site: phosphate (Ser) (covalent) (by cAMP-dependent kinase) #status predict F; 285,290,330/Binding site: iron (His, His, Glu) #status predicted
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                A; Molecule type: protein

A,Note: a defect in this gene can cause phenylketonuria
C,Complex: homodimer
C,Complex: homodimer
C,Function:
A,Description: catalyzes the 4'-hydroxylation of phenylalanine to tyrosine by tetrahydrol
A,Description: catalyzes the 4'-hydroxylation of phenylalanine catabolism
C,Superfamily: phenylalanine 4-monoxygenase
C,Keywords: biopterin; homodimer; iron; metalloprotein; monoxygenase; oxidoreductase; p?15/Binding site: phosphate (Ser) (covalent) (by calmodulin-dependent kinase) #status predicte
F;285,290,330/Binding site: iron (His, His, Glu) #status predicted

tyrosine 3-monooxygenase (EC 1.14.16.2) - bovine
tyrosine 3-monooxygenase (EC 1.14.16.2) - bovine
KyAlternate names: tyrosine 3-hydroxylase
CySpecies: Bos primigenius taurus (cattle)
C;Date: 31-Dec-1991 #sequence_revision 31-Dec-1991 #text_change 31-Mar-2000
C;Accession: JL003; A27687

phenylalanine-4-hydroxylase [imported] - Caulobacter crescentus
C;Species: Caulobacter crescentus
C;Species: Calobacter crescentus
C;Date: 20-Apr-2001 #sequence_revision 20-Apr-2001 #text_change 20-Apr-2001
C;Accession: C87449
R;Nierman, W.C.; Reldhlyum, T.V.; Paulsen, I.T.; Nelson, K.B.; Eisen, J.; Heidelberg, J.F.B.; Laub, M.T.; DeBoy, R.T.; Dodasva, R.J.; Durkin, A.S.; Gwinn, M.L.; Haft, D.H.; Koloné
n, J.; Ermolaeva, M.; White, O.; Salzberg, S.L.; Shapiro, L.; Venter, J.C.; Fraser, C.M.
Proc. Natl. Acad. Sci. U.S.A. 98, 4136-4141, 2001

NUP133 protein - yeast (Saccharomyces cerevisiae)

NJAlternate names: protein YKR082w; protein YKR402

C;Species: Saccharomyces cerevisiae

C;Date: 03-May-1994 #sequence revision 03-May-1994 #text_change 21-Jul-2000

C;Accession: $3816(0; $42011); $51915; $39130; $39130;
